Video of Setting Up Emails Account In Windows Mail

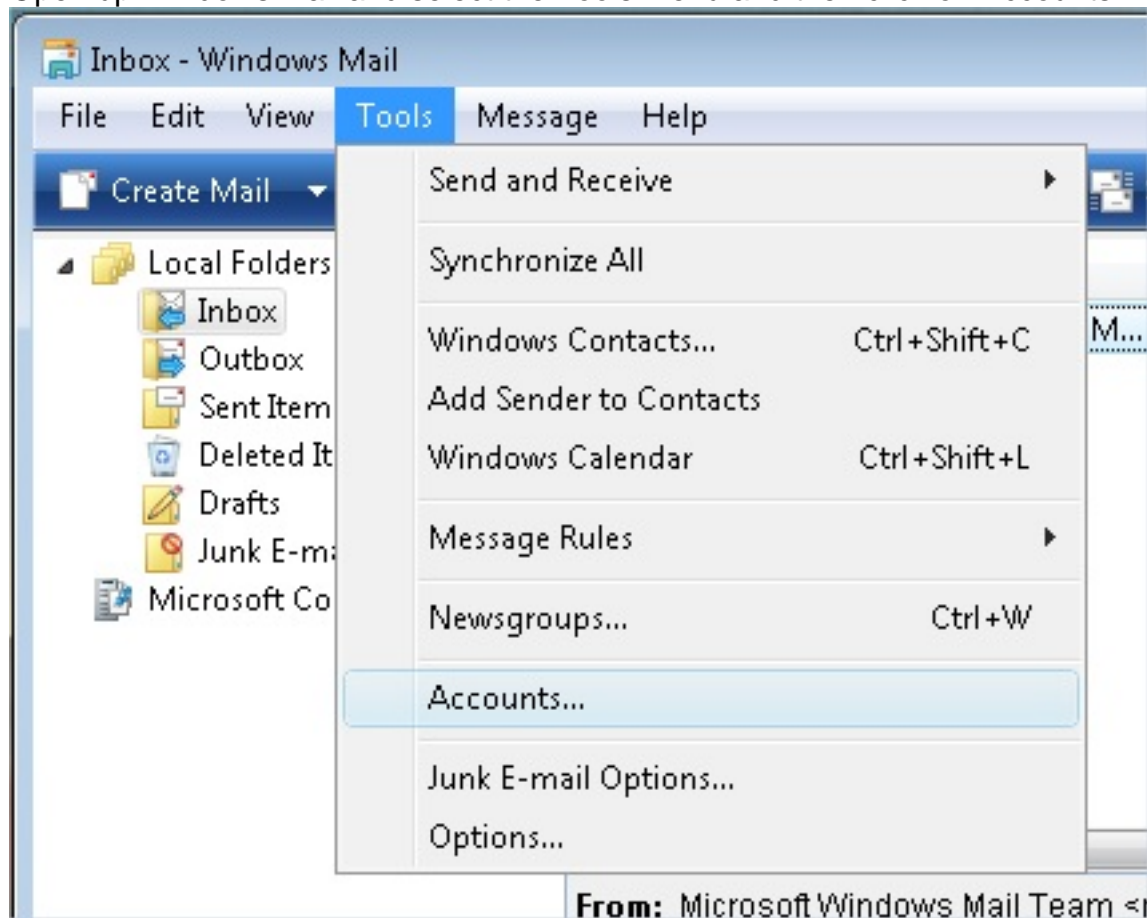

Setting up your email account using windows mail

```
var so = new SWFObject("http://www.sitewizard-support.co.uk/images/File/windowsmail.swf",  
"WindowsMail", "700", "512", "8", ""); so.addParam("wmode", "transparent"); so.write("tutorial");
```

Guide of Setting Up Emails Account In Windows Mail

Step1

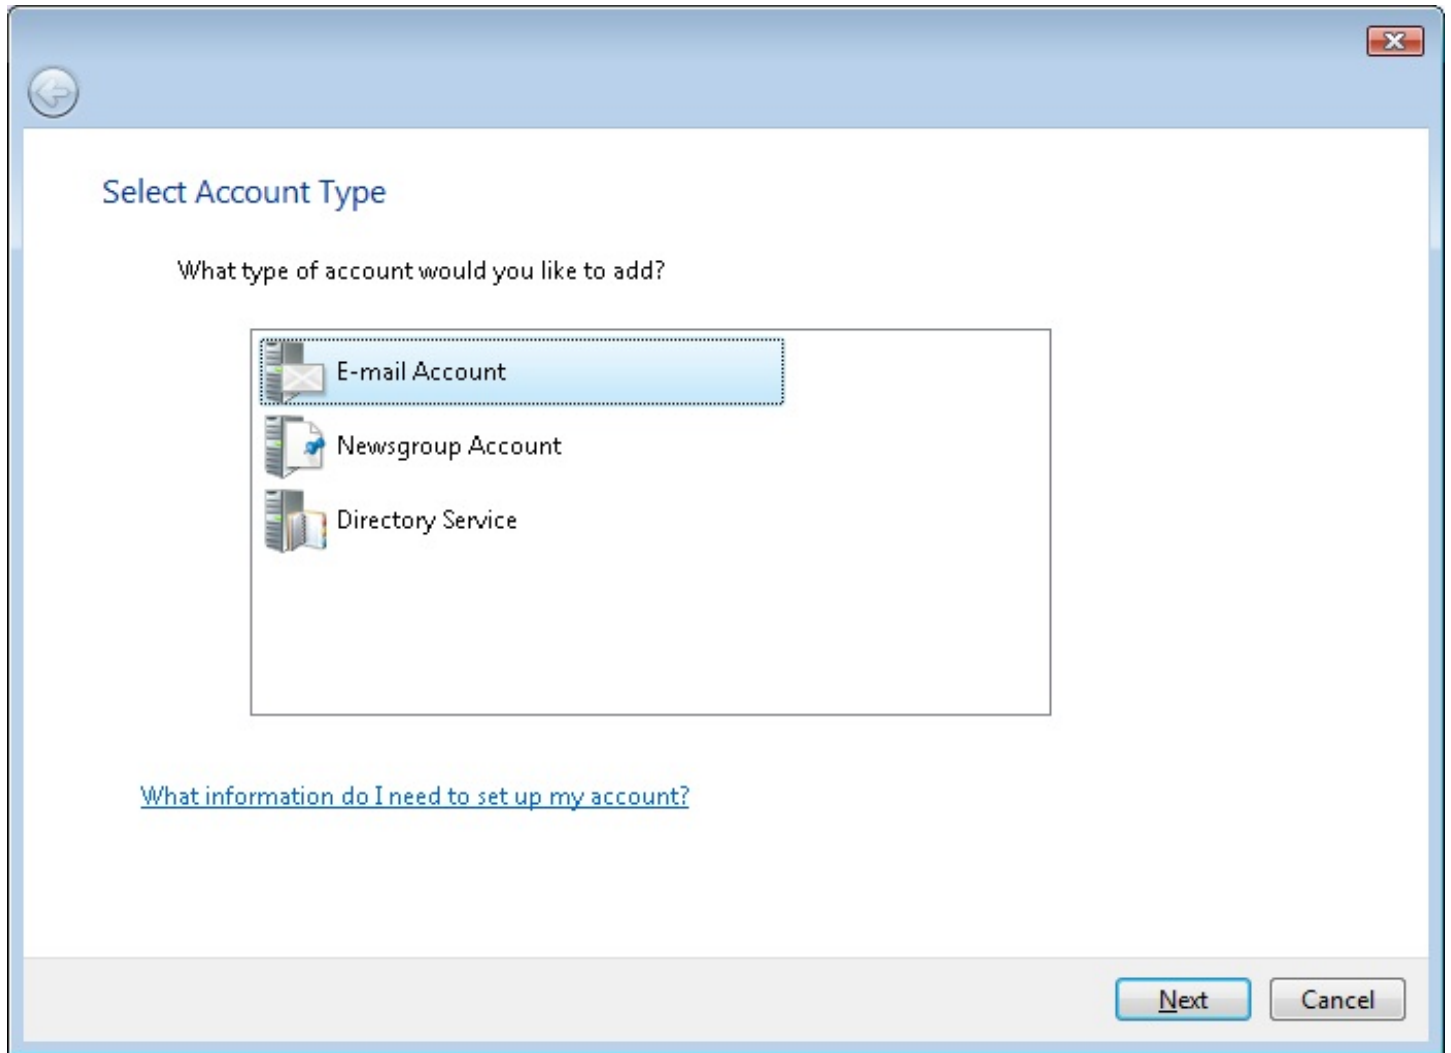

Open up Windows Mail and select the Tools menu and then click on Accounts.

Step2

Select Email Account and click next.

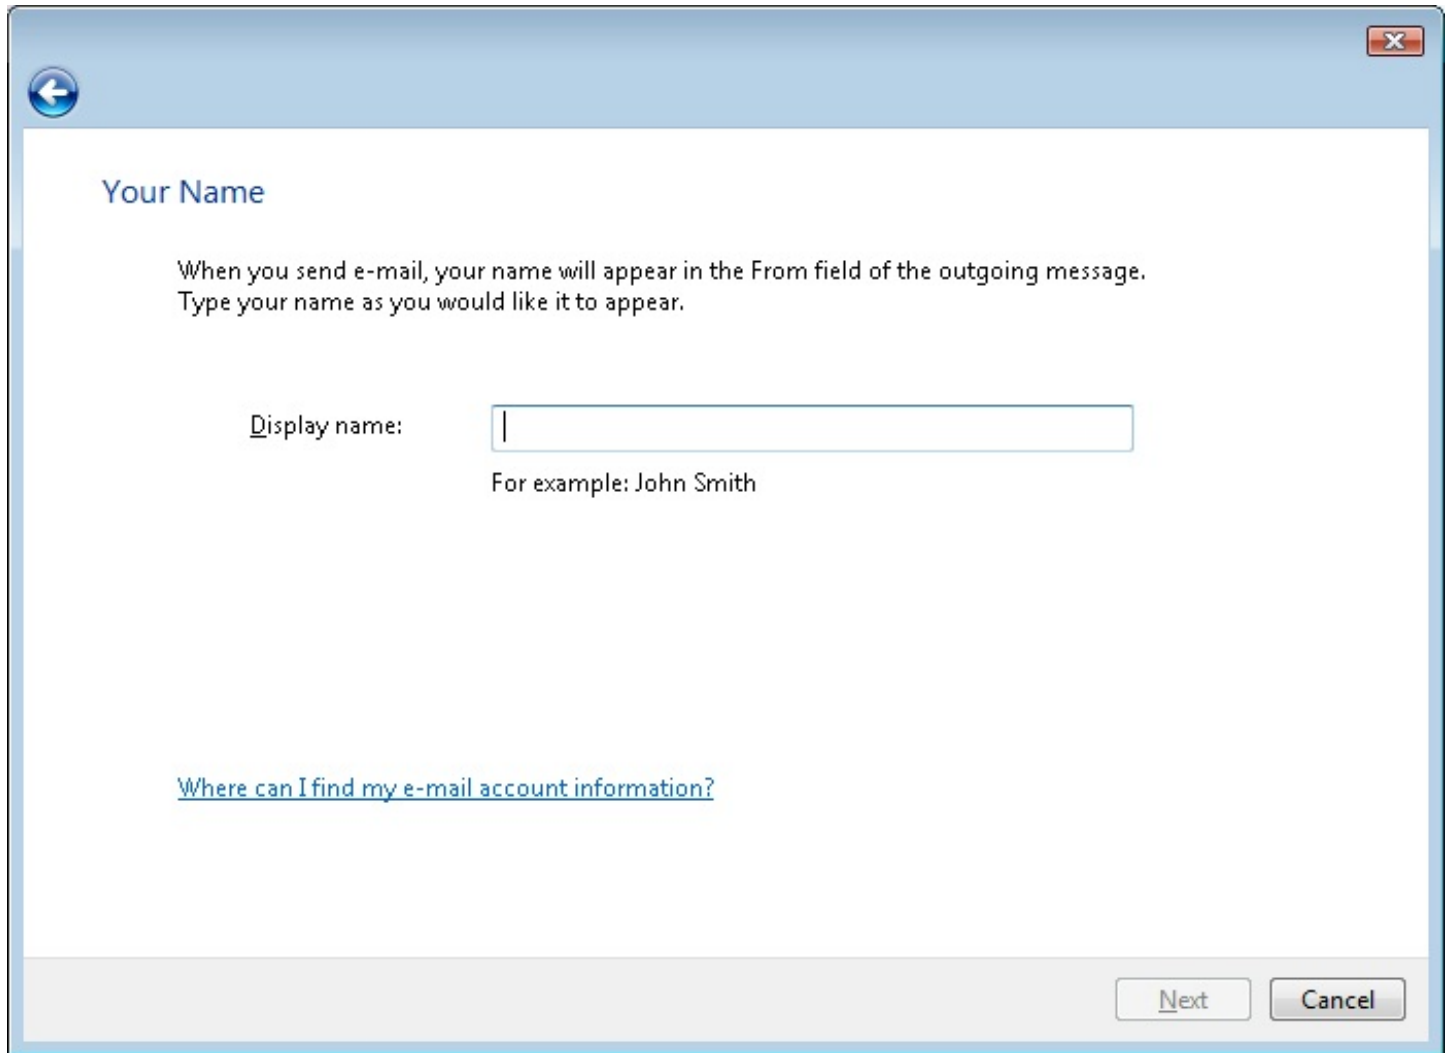

Setting Up: Email Accounts In Windows Mail (Vista)

Step3

Enter either your name or your company name as the display name and click next.

Setting Up: Email Accounts In Windows Mail (Vista)

Your Name

When you send e-mail, your name will appear in the From field of the outgoing message. Type your name as you would like it to appear.

Display name:

For example: John Smith

[Where can I find my e-mail account information?](#)

Next Cancel

Step4

Enter the email address that you are setting up and click next.

Setting Up: Email Accounts In Windows Mail (Vista)

Internet E-mail Address

Your e-mail address is the address other people use to send e-mail messages to you.

E-mail address:

For example: someone@microsoft.com

[Where can I find my e-mail account information?](#)

Next Cancel

Step5

Make sure that POP3 is selected as the Incoming e-mail server type. Then enter the incoming server and outgoing server as specified in our email. Tick the box that says Outgoing server requires authentication. Now click next.

Setting Up: Email Accounts In Windows Mail (Vista)
